embracing the future

WHO WE ARE

"PT. Mignon Sista International is an Indonesian local producer offering **essential oils, spices** and **woods** to both global and local market. Our products are **100% pure** and **natural**, originally produced from rich irreplaceable and bountiful nature of Indonesia."

ABOUT US

OUR NATURAL RAW MATERIALS REVEAL THE RICHNESS OF INDONESIAN SOIL

“ Mignon represents the richness of Indonesian soil in agriculture products. Our passion starts with essential oils, then pushes to spices, woods and food services.

We are blessed to be located between two large continents and two vast oceans. Blessed with fertile soil, gracious climate and populated by an astounding biodiversity in the planet. Indonesia is the best source of agricultural products. We are offering you the essence of nature. ”

VISION & MISSION

WE ARE THE SOLUTION MAKER

We make things simple and only participate in markets where we can make a significant contribution.

WE DREAM BIG

Growing and Improving is a must to adapting customer preferences and demands.

OUR VALUE

WE ARE PASSIONATE IN WHAT WE DO

We are committed to do our very best for our customers. We uphold the highest standards of integrity in all our actions.

OUR PRODUCT

ESSENTIAL OILS

Scents of natural life and oil for all seasons, essential oil is a concentrated hydrophobic liquid containing volatile aroma compounds from plants such as leaves, roots, barks, buds and woods from which they were extracted.

PATCHOULI OIL
Pogostemon cablin

Patchouli plant is a bushy herb of the mint family and it is native to tropical regions of Asia. Indonesia is the largest producer in the world. Oil comes from distillation of leaves and stems with a distinctive herbaceous, camphoraceous, musky, earthy aroma, high in the chemical compounds of patchouli alcohol and terpenes.

CLOVE OIL
Eugenia caryophyllata

Indonesia is known as the dominant producer of clove globally for decades. There are three types of clove oil available in the market such as Clove Bud Oil, Clove Stem Oil and also Clove Leaf Oil. From ancient times, clove oil is a favourite among health care professionals and health conscious individual alike, for its many useful and healing properties.

CITRONELLA OIL
Cymbopogon winterianus

NUTMEG OIL
Myristica fragrans

Nutmeg which has the best quality in the world of commerce is derived from nutmeg *Myristica fragrans*. Same like patchouli, Indonesia is the largest producer of nutmeg oil in the world; providing 75-80% of global supply. Nutmeg has been used for centuries for digestive and kidney problems. But now nutmeg oil is well known for flavouring in beverages application.

OUR PRODUCT

ESSENTIAL OILS

VETIVER OIL
Vetiveria zizanioides

FRESH GINGER OIL
Zingiber officinale

Vetiver oil is loved for its rich, exotic and complex aroma. The oil is extracted from plant's roots and used extensively in perfumes as a base note and fixative, vetiver's woody, earthy scent complements many other essential oils.

MASSOIA BARK OIL
Cryptocarya massoia

Massoia bark has a sweet, coconut-like aroma and is steam distilled to yield massoia bark oil. The bark is obtained by cutting the tree at the base, making circular incisions at one meter intervals, lifting the bark off and allowing it to dry. Its main component is lactone which is used for food flavouring, as an additive in butter and milk flavour.

ALPINIA GALANGA OIL
Alpinia malaccensis

Ginger oil is produced from steam distilled rhizome or rootstock of Zingiber officinale. The oil has characteristic of warm, citrus-like, spicy, earthy and sweet aroma. It also has multitude of health benefits.

Alpinia Galanga Oil is obtained by steam distillation from the dried rhizome of Alpinia malaccensis. An aromatic herb from the family Zingiberaceae has been used for various purposes including insecticidal activity, stomachache, antibacterial, antifungal, antitumor, antiulcer, antiallergic antioxidant and food condiment.

LEMONGRASS OIL
Cymbopogon citratus

Lemongrass oil has fresh, citrusy scent and commonly used as culinary and medicinal herbs. One of the main components of lemongrass essential oil is citral, a compound found to act as an antimicrobial (a substance that destroys or suppresses the growth of microorganisms, including bacteria and fungi). Lemongrass essential oil also contains limonene, a compound shown to reduce inflammation and knock out bacteria in scientific research.

CAJUPUT OIL
Melaleuca leucadendra

Cajuput oil is produced by steam distillation from the leaves of the Myrtaceous tree, it also goes by the botanical name Melaleuca-leucadendra. It can be found close to shorelines on the island of Pulau Buru in Maluku and in some parts of Central Java. Indonesia is one of the largest producers of cajeput oil and is also the largest consumers. More than 90% of the oil produced is consumed locally by the pharma industry.

GURJUN BALSAM OIL
Dipterocarpus turbinatus

Gurjun Balsam oil is prepared from the wood of Gurjun plant by using the steam distillation extraction process. The soft fragrance is woody, sweet, dry, balsamic and resinous with hints of pine, patchouli and camphor – beautifully calming and centering.

AGARWOOD OIL
Aquilaria malaccensis

Agarwood oil / Oud oil is distilled from agarwood and extracted from selected wood of Aquilaria by steam distillation. The resin-embedded wood is valued in Arabic-middle eastern culture for its distinctive fragrance, and thus is used for incense and perfumes. The aromatic qualities of agarwood are influenced by the species, geographic location, its branch, trunk and root origin, length of time since infection, and methods of harvesting and processing. One of the main reasons for the relative rarity and high cost of agarwood is the depletion of the wild resource.

SANDALWOOD OIL
Santalum Album

Our pure and natural sandalwood Santalum album oil is extracted from the rich heartwood of the tree through steam-distillation and is suitable for use in fragrances, aromatherapy, flavours, cosmetics and skincare products. Its aromatic, fixative and medicinal properties have been known and treasured for centuries and now the oil is available from a truly ethical and sustainable source.

OUR PRODUCT SPICES

The majority of the world's vanilla is the *V. planifolia* species, more commonly known as Bourbon vanilla or Madagascan vanilla, which is produced in Madagascar and neighboring islands in the southwestern Indian Ocean and in Indonesia. Combined, Madagascar and Indonesia produce two-thirds of the world's supply of vanilla.

Vanilla is the second-most expensive spice in the world because growing the vanilla seed pods are labor-intensive. Despite the expense, vanilla is highly valued for its flavor. As a result, vanilla is widely used in both commercial and domestic kitchen, perfumeries and aromatherapy.

ONLY TWO SPECIES

Vanilla planifolia and *Vanilla tahitensis* — are cultivated for commercial used as flavors and fragrances.

- *Vanilla planifolia* beans have a strong, rich, creamy, sweet and almost hay-like aroma. The beans are thick skinned and longer than *Vanilla tahitensis* beans. They also contain more seeds than *Vanilla tahitensis* beans.
- *Vanilla tahitensis* beans are shorter and plumper and have higher water and oil content comparing to *Vanilla planifolia* beans.

Mignon offers a wide selection of high quality vanilla beans.

WOODS

"WOOD OF THE GODS" *Aquilaria malaccensis & Aquilaria filaria*

Commonly known as Agarwood or Aloeswood or Gaharu has been traded and highly coveted for millenias. The resinous wood is used for incense and medicinal purposes. While pure resin in distilled form is used as an essential oil as well as a perfume component. Agarwood is formed in the hardwood of aquilaria trees when they become infected with a type of mould. Aloeswood or Gaharu is a fragrant dark resinous wood used in incense, perfume and small carvings.

TABI'I

SENAI'I

POWDER

SANDALWOOD *Santalum album*

Unlike many other aromatic woods, Sandalwood is heavy, yellow in color and fine-grained. Sandalwood also retain its fragrance for decades. The health benefits of sandalwood can be attributed to many properties, such as antiseptic, anti-inflammatory, antiphlogistic and many more.
